Legal Reasoning (विधिक तर्कशक्ति) [Q1 – Q10]

In the landmark case of *Donoghue v Stevenson* (1932), the House of Lords established the 'neighbour principle' in tort law. The court held that a manufacturer owes a duty of care to the ultimate consumer of a product, even if there is no direct contractual relationship between them. The principle states that one must take reasonable care to avoid acts or omissions that can reasonably be foreseen to injure one's 'neighbour' – persons so closely and directly affected by the act that they ought reasonably to be in contemplation. This case gave birth to the modern law of negligence.

Logical Reasoning (तार्किक तर्कशक्ति) [Q11 – Q20]

Environmental activists argue that the government should impose a complete ban on single-use plastics to combat pollution. They contend that plastic waste is devastating marine ecosystems and contributing significantly to soil contamination. However, manufacturers counter that such a ban would lead to massive unemployment in the plastics industry and force consumers to rely on alternatives that are either more expensive or less hygienic. Some economists suggest a middle path: imposing a hefty tax on single-use plastics rather than an outright ban, to discourage use while allowing a gradual transition.

Q11. Which of the following, if true, would most weaken the manufacturers' argument that a plastic ban would cause massive unemployment?

- A Marine biodiversity has declined by 40% in areas with high plastic pollution
- B Several countries that imposed plastic bans saw no significant increase in unemployment
- C Plastic alternatives are currently twice as expensive as single-use plastics
- D The government has not announced any support for displaced workers

English Language (अंग्रेज़ी भाषा) [Q21 – Q30]

The rule of law is the foundation upon which democratic societies are built. It demands that every individual, institution, and entity — public and private, including the state itself — is accountable to laws that are publicly promulgated, equally enforced, and independently adjudicated. The concept, while ancient in origin, was given modern expression by A.V. Dicey in his 1885 work 'Introduction to the Study of the Law of the Constitution.' Dicey articulated three pillars: supremacy of law, equality before the law, and the predominance of legal spirit. Contemporary scholars, however, argue that mere formal equality before the law is insufficient without substantive justice — laws must not only be equal in application but must also be just in their content.
